Sub: Development of Jalsur - Subramania Road in Puttur, South Kanara - Mainad area, as an all-weather road.

Representations have been made on more than one occasion to improve Jalsur-Subramania road as an all-weather road. This is about 26 miles in length and is cut up by numerous streams on account of which vehicular traffic is rendered impossible during the monsoon.

It is the main line of communication in the Sullia Pirka where community development scheme is operating. All activities under the Scheme are necessitated to be held up during the monsoon. This is also the nearest route to the great pilgrim centre of Subramania. At present, people are put to great inconvenience as the streams are unbridged.

In view its great utility, I have reason to believe that works on this road will be included in the II Five Year Plan. In order to make the entire road serviceable works on the last reach, particularly, a bridge over the Kallaje river at mile 22 or so and one or two other minor culverts are important and without them the road link becomes incomplete. Therefore, it becomes imperative that the proposed bridge on the Kallaje river and the culverts also should be included in the II Five Year Plan along with other ^{works} on the road. Hope this matter will receive your kind attention.

Thanking you,

Yours faithfully,

K. Venkataramana Gowda
M.L.A.
